Jupiter Mines Ltd (JMS.ASX)

No surprises as 4Q mostly delivers

Event:

4Q FY19 result; Formal process to review iron ore assets.

Investment Highlights:

- Jupiter Mines Ltd (JMS) unaudited 4Q report largely met our expectations. Tshipi (100%) generated NPAT of \$88.5M in-line with our forecast of \$91.2M, while JMS Marketing reported NPAT of \$3.4M vs our estimate of \$3.5M.
- We deduced that JMS's attributable NPAT comprising 49.9% Tshipi share, Marketing, and Corporate (not reported) – for the 4Q was \$44.2M in-line with our forecast of \$45.6M.
- 4Q shipments were 0.85Mt in-line with our 0.83Mt estimate, and resulted in total of 3.5Mt for FY19e, as per previous company guidance. 4Q FOB costs of U\$\$2.27/dmtu were slightly higher than our forecast of \$2.16 due to higher strip ratio and greater proportion of product trucked vs railed.
- JMS had attributable cash of \$100M end 4QFY19 (\$73M consolidated plus \$27M share of Tshipi). \$49M of cash has been earmarked for payment in May 2019 of the recently declared 2.5 cps dividend.
- The company recently announced it has initiated a process to review strategic
 options for its Central Yilgarn Iron Ore projects. We believe that the market is
 not ascribing any value to the assets, especially given the recent rally in iron ore
 markets. We expect the preference of JMS is to divest the assets, as it does not
 want to contribute further funds to their development.
- We currently value JMS's iron ore assets at \$47M, or \$0.02/share, based on EV per JORC Resource tonne of contained Fe multiple. We use a multiple of \$0.07/t contained Fe which is the average of select ASX listed pure iron ore explorers.

Earnings and Valuation:

- **Earnings revisions.** We have made only slight changes with FY19e NPAT reduced -1% to \$190M, FY20e -2% to \$125M, and FY21e -2% to \$103M on modest cost revisions
- Our share valuation has reduced slightly to \$0.61 from \$0.63 based on earnings changes.
- JMS has mitigated its marked discount to manganese peers over the past month, and is now trading at 5.3x PE and 3.1x EV/EBITDA on FY20e earnings, which are at 36% and 13% discount to peers' average of 8.3x and 3.6x.

Recommendation:

We maintain our Buy recommendation with a revised 12-month price target
of \$0.61 (prior \$0.63) based on our 1.0x Price/NPV. Catalysts for the share
price include final FY19e earnings report; higher Mn prices; cost reductions;
further dividends; realisation of value for iron ore assets; and corporate
activity.

Disclosures

The analyst owns 302,000 JMS shares.

Foster Stockbroking and associated entities (excluding Cranport Pty Ltd) own 9,272,604 JMS shares.
Cranport Pty Ltd owns 10,500,000 JMS shares.
Refer details end of report.

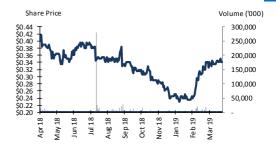

Foster Stockbroking was Co-Manager to the \$240M IPO of 600M JMS shares at \$0.40 in April 2018. Foster Stockbroking received fees for this service, including a discretionary fee. Refer to prospectus for details.

4Q REPORT REVIEW – MOSTLY IN-LINE AS TARGET SALES ACHIEVED

- Jupiter Mines Ltd's (JMS) unaudited 4Q report showed Tshipi generated NPAT of \$88.5M (100%), in-line with our forecast of \$91.2M. In terms of JMS's attributable Tshipi share (49.9%), NPAT equated to \$44.2M vs our forecast of \$45.6M. JMS's Marketing division generated NPAT of \$3.4M, in-line with our estimate of \$3.5M.
- We deduce that JMS's attributable 4QFY19e NPAT comprising 49.9% Tshipi share, Marketing, and Corporate (not reported) for the 4Q was \$44.2M, or 3% below our forecast of \$45.6M (Figure 1).

Slightly higher FOB cost the difference

- The chief reason for the slightly lower JMS attributable NPAT seemed to be higher FOB costs in the 4Q of US\$2.27/dmtu, which was 5% above our estimate of \$2.16 and the \$2.00 achieved in the 3Q. Key contributors were higher strip ratio of 12.9x during the quarter vs the 10.4x we had forecast and the 11.0x achieved in the 3Q, as well as greater proportion of material trucked vs railed.
- JMS attributable sales of \$130M were a touch above our forecast of \$128M, and partially offset the higher costs.

Target shipments of 3.5Mt for FY19e achieved

• Tshipi shipments in the 4Q were 0.85Mt in-line with our 0.83Mt forecast, and resulted in total shipments for the year being 3.5Mt, as per company's previous guidance. Shipments were ahead of production of 0.79Mt, due to deferred shipments of product from the 3Q.

Attributable cash \$100M end 4QFY19e, or \$51M post-dividend

- JMS' attributable cash at the end of the period was \$100M, which was below our estimate of \$124M. The reason was the lower than expected operating cash flow of Tshipi in the 4Q of \$5M vs our estimate of \$82M. This was due to higher tax and royalty payments made by Tshipi as reconciliations for the full year.
- The attributable cash of \$100M is prior to the JMS final dividend payment, which is due May 2019. Adjusted pro-forma for payment of the \$49M dividend (2.5cps) will result in attributable cash of \$51M.

IRON ORE – SEEKING TO REALISE VALUE

- JMS this week announced it had initiated a process to review strategic options regarding its iron
 ore assets, which comprise the eponymously located Central Yilgarn Iron Ore Projects (CYIOP) in
 Western Australia. The CYIOP comprises two assets Mt Mason and Mt Ida. These have been
 on care and maintenance since 2015, when iron ore markets were depressed and JMS was
 focusing on development and commissioning of the Tshipi mine.
- With the Tshipi mine now well established, the company having relisted on ASX, a recent rally in iron ore equities and prices, and the belief that the market is attributing negligible, if any, value to the iron ore projects, JMS has decided now is an opportune time to launch a review.
- We believe strategic option desired is a divestment, as JMS has indicated it does not want to fund or develop the projects.

Mount Mason - DSO low capex but short mine life

• Mt Mason is a hematite DSO project with JORC Resource of 6.2Mt @ 60.1%. A scoping study was released in 2011 and the project was subject to feasibility prior to being put on care and maintenance. We surmise Mt Mason would be attractive for a miner seeking incremental tonnes from a project offering relatively low capex, high IRR, and a short lead time to get into production. We note Mt Mason is only approximately 54km from Mineral Resources Ltd's (MIN) Koolyanobbing mine, which rails ore to Esperance port. At first glance we view MIN as a logical acquirer given it has nearby exiting infrastructure and equipment that could reduce capex, generate synergies, and make it even more compelling.

Mount Ida - Large scale, high capex, magnetite project

Mt Ida is the polar opposite of Mt Mason – magnetite, long mine life, large resource, and high
capex. The project has a JORC Resource of 1,846Mt @ 36.7% Fe. As per Mt Mason, a scoping
study was released in 2011 and the project put on care and maintenance during feasibility
studies. We expect Mt Ida would suit a party seeking long term offtake or production, and
strategically committed to iron ore.

Our valuation of iron are assets is \$47M based on comparative JORC multiples

- We currently value JMS's iron ore assets at \$47M, or \$0.02/share, based on an EV per JORC Resource of contained Fe tonnes multiple. We have used a multiple of \$0.07, which is derived from the average of select ASX listed pure iron ore explorers only.
- Key outcomes of the historical scoping studies are shown in Figure 3. While obviously these
 would require significant updates given the time elapsed, change in market conditions,
 technology advances, and potential for optimization such as cost and capex reductions, they at
 least provide an approximate ball park to economics.
- We note our valuation is only 24% of the combined Scoping Study NPVs of both projects.

Figure 3: 2011 Scoping Study Results on Central Yilgarn Iron Ore Projects

EARNINGS FORECASTS REVISIONS

 We have made modest changes to our earnings forecasts for JMS post the 4Q report, with adjusted NPAT for FY19e down 1% to \$190M, FY20e down 2% to \$125M, and FY21e down 2% to \$103M. The key drivers of earnings changes is slightly higher costs.

VALUATION

Share valuation decreases to \$0.61 from \$0.63

Our share valuation of JMS has slightly reduced to \$0.61 from \$0.63, post our earnings revisions. We employ a DCF model using WACC of 10%.

Figure 5: JMS Valuation

Discount to peers has contracted but is still marked

• We have revisited our peer multiple comparison with other Mn exposed miners in Figure 6 on our one-year forward (February end FY20e) earnings estimates. Previously in February 2019 JMS traded at 56% and 43% discount on PE and EBITDA multiples on FY20e. These have now contracted respectively to 36% and 13%, with JMS trading at 5.3x and 3.1x. We believe the declaration of 2H dividend and a better 4Q performance have been contributors. We still expect the discount to be eliminated as the company further demonstrates performance.

All earnings adjusted to FY20e y/end February

RECOMMENDATION – BUY, 12-MONTH SHARE PRICE TARGET \$0.61 (PRIOR \$0.63)

- We maintain our Buy recommendation on JMS, slightly reducing our 12-month share price target to \$0.61 from \$0.63, based on 1.0x P/NPV revised DCF valuation.
- We expect catalysts for the share price to be positive mine performance, corporate activity,
 JMS dividend, costs reductions, mining of boundary pillar, and profit reports.

Disclaimer & Disclosure of Interests. Foster Stockbroking Pty Limited (**Foster Stockbroking**) has prepared this report by way of general information. This document contains only general securities information or general financial product advice. The information contained in this report has been obtained from sources that were accurate at the time of issue, including the company's announcements and pathfinder prospectus which have been relied upon for factual accuracy. The information has not been independently verified. Foster Stockbroking does not warrant the accuracy or reliability of the information in this report. The report is current as of the date it has been published.

In preparing the report, Foster Stockbroking did not take into account the specific investment objectives, financial situation or particular needs of any specific recipient. The report is published only for informational purposes and is not intended to be personal financial product advice. This report is not a solicitation or an offer to buy or sell any financial product. Foster Stockbroking is not aware whether a recipient intends to rely on this report and is not aware of how it will be used by the recipient. Before acting on this general financial product advice, you should consider the appropriateness of the advice having regard to your personal situation, investment objectives or needs. Recipients should not regard the report as a substitute for the exercise of their own judgment.

The views expressed in this report are those of the analyst named on the cover page. No part of the compensation of the analyst is directly related to inclusion of specific recommendations or views in this report. The analyst receives compensation partly based on Foster Stockbroking revenues, including any investment banking and proprietary trading revenues, as well as performance measures such as accuracy and efficacy of both recommendations and research reports. Any views and opinions expressed in the report are those of the research analyst and have not been influenced by corporate advisory, the issuing company, or its other advisers.

Foster Stockbroking believes that the information contained in this document is correct and that any estimates, opinions, conclusions or recommendations are reasonably held or made at the time of its compilation in an honest and fair manner that is not compromised. However, no representation is made as to the accuracy, completeness or reliability of any estimates, opinions, conclusions or recommendations (which may change without notice) or other information contained in this report. To the maximum extent permitted by law, Foster Stockbroking disclaims all liability and responsibility for any direct or indirect loss that may be suffered by any recipient through relying on anything contained in or omitted from this report. Foster Stockbroking is under no obligation to update or keep current the information contained in this report and has no obligation to tell you when opinions or information in this report change.

Foster Stockbroking seeks to do business with companies covered in research. As a result investors should be aware that the firm may have a conflict of interest which it seeks manage and disclose by a number of measures.

Foster Stockbroking and its directors, officers and employees or clients may have or had interests in the financial products referred to in this report and may make purchases or sales in those the financial products as principal or agent at any time and may affect transactions which may not be consistent with the opinions, conclusions or recommendations set out in this report. Foster Stockbroking and its Associates may earn brokerage, fees or other benefits

from financial products referred to in this report. Furthermore, Foster Stockbroking may have or have had a relationship with or may provide or has provided investment banking, capital markets and/or other financial services to the relevant issuer or holder of those financial products.
