# JUPITER HALF-YEAR RESULTS AND DIVIDEND DECLARATION

Jupiter Mines Limited ("Jupiter" or "the Company") (ASX: JMS) is pleased to release its consolidated financial results for the half-year period ended 31 August 2019 ("HY2020").

CONSOLIDATED HIGHLIGHTS	HY2020 (\$m)	HY2019 (\$m)
Share of Tshipi net profit after tax	74.7	107.7
Revenue & other income	6.6	6.8
Consolidated net profit after tax	69.2	108.2
Consolidated cash position	76.6	15.5
Basic earnings (\$ per share)	0.0353	0.0556
Half-year interim dividend (\$ per share)	0.04	0.05
Pay-out ratio (%)	90.7	92.6
Yield (%) <sup>1</sup>	12.3	15.4
Total cash distributed to shareholders <sup>2</sup>	378.8	251.5

TSHIPI HIGHLIGHTS (100% BASIS)	HY2020	HY2019
Sales (million tonnes)	1.73	1.87
Production (million tonnes)	1.77	1.78
Average cost/tonne (FOB, ZAR / dmtu)	31.60	29.38
Revenue (ZAR million, gross)	4,670	5,323
Earnings before interest, tax and depreciation (ZAR million)	2,352	3,202
Net profit after tax (ZAR million)	1,506	2,087
Net cash from operating activities (ZAR million)	1,798	2,590

Tshipi has returned dividends to Jupiter of ZAR830 million relating to HY2020, versus ZAR948 millon for HY2019. The decrease can be mainly attributed to a softening of manganese prices. Despite this, Tshipi has maintained high levels of cash generation supported by continued low operating costs.

Whilst the recent decline in average manganese price is noted, the Jupiter Board has declared an interim half-year dividend of \$0.04 per share. Jupiter remains committed to distributing almost all cash received from Tshipi, achieving a payout ratio of over 90% with this dividend, and a 12% yield for its shareholders.

"The focus for the team is to deliver tonnes and control costs. The work on cost optimisation initiatives continue, which is especially pertinent in this low manganese price environment", said Jupiter's CEO, Priyank Thapliyal. "Jupiter's 12% yield compares very favourably to other low corporate yields and yield curves globally."

The interim dividend record date is 7 November and the dividend will be paid on 21 November.

#### Notes

- 1. Yield is based on closing share price on 30 October 2019 of \$0.325 and relates to each half-year period only.
- 2. Total cash distributed to Jupiter shareholders since 2017, inclusive of distributions by way of share buy-backs and dividends. HY2020 figure includes dividend to be paid on 21 November 2019.

Brian Beem Non-Executive Director; alternate to Hans Mende (appointed 9 October 2019)

Directors were in office since the start of the period unless otherwise stated.

#### **Principal Activities**

During the half-year period, the principal activities of Jupiter have been its investment in Tshipi é Ntle Manganese Mining (Pty) Limited ("Tshipi") in South Africa and the sale of manganese ore.

### **Dividends**

Dividends declared and/or paid during the half-year period were as follows:

	Dividend per share	Unfranked	\$ Total
2019 Final Dividend – paid 21 May 2019	\$0.025	100%	48,974,775
2020 Interim Dividend – declared 31 October 2019	\$0.040	100%	78,359,641

On 30 October 2019, the Directors declared an interim dividend for the half-year ended 31 August 2019 of \$0.04 per ordinary share, to be paid on 21 November 2019. Both dividends above are wholly conduit foreign income.

#### **REVIEW OF OPERATIONS AND RESULTS**

Jupiter recorded a consolidated result for the half-year of \$69,155,253 profit after tax (HY2019: profit of \$108,192,412 after tax), including a share of net profit from its investment in Tshipi of \$74,653,907 (HY2019: \$107,673,962).

#### **TSHIPI BORWA MANGANESE MINE**

The Tshipi Borwa Manganese Mine is a long-life, open pit manganese mine with an integrated ore processing plant located in the Kalahari Manganese Fields in the Northern Cape Province of South Africa. Tshipi remains the largest single manganese mine in South Africa and one of the five largest manganese mines globally.

Figures 1 & 2: Tshipi Borwa Pit

For the half-year period ended 31 August 2019, Tshipi recorded a net profit after tax of ZAR1.5 billion (\$149.3 million) (HY2019: ZAR2.1 billion; \$215.8 million) and declared a total of ZAR1.75 billion (\$173.8 million) in dividends to its shareholders (HY2019: ZAR2 billion; \$206.8 million). The decrease from the previous half-year can be mainly attributed to a softening of manganese prices. Despite this, Tshipi has maintained high levels of cash generation supported by continued low operating costs.

	Unit	HY2020	HY2019	FY2019
Mined volume	Bcm	5,689,716	5,246,857	11,234,344

Average cost of production	FOB, ZAR per dmtu	31.60	29.38	30.68
Average CIF price achieved (high grade lumpy)	CIF, USD per dmtu	5.51	6.52	6.41

Table 1: Summary of operating and financial information for Tshipi Borwa Manganese Mine

Figure 3: Tshipi net profit after tax and shareholder distributions against average manganese prices (37% FOB Port Elizabeth; Source: Metal Bulletin)

The cost of production remained steady throughout the period, averaging ZAR31.60 (\$3.14) per dmtu (FOB) (HY2019: ZAR29.38; \$3.03).

Whilst mining was behind schedule for the period, Tshipi management remains confident of increasing volumes once an overhaul of excavators has been completed, drilling inefficiencies have been resolved and with the completion of a difficult mining cut. As such, stockpiles have not yet been replenished as planned. Tshipi produced a total of 1,771,719 tonnes for HY2020, in line with target.

After signing an agreement with South32 Limited in June, Tshipi commenced mining the barrier pillar between the Borwa and Mamatwan pits in August. Actual mining volumes for the barrier pillar area were ahead for the period.

Rail and road volumes for the half-year period were ahead of plan, with rail volumes in line with Tshipi's MECA allocation. Road volumes are ahead of plan largely due to additional low grade volumes moved.

Tshipi commenced shipping through the Namibian Port of Lüderitz in the first week of September, opening an additional export route at a similar cost to current routes. Overall sales volumes remain on track to achieve the FY2020 target of 3 million tonnes.

One lost time injury ("LTI") was sustained during the period, a positive decrease from the 6 LTIs recorded in the previous financial year. The initiatives and campaigns implemented by management to address incident causes and other findings raised through inspections and hazard reporting have now yielded positive outcomes. Tshipi continues to have a proud track record of safety and has had no fatalities since inception.

Figure 4: Number of Lost Time Injuries (LTIs)

Tshipi continues to support the host community by implementing Local Economic Development projects which are a benefit to our communities. The recent projects that have been completed are the bulk water supply, construction of a clinic, schools development, provision of water to one of the clinics in the community and the construction and paving of a community road. Going forward Tshipi's focus will be on integrated schools development projects which include supply of water, sanitation as well as infrastructure development.

With regards to the environmental impact of the mine, Tshipi's management continues to address the impact of business activities on an ongoing basis by integrating issues such as pollution control, waste management and rehabilitation activities into their operating procedures. Tshipi has implemented an integrated Weekly Planning process where potential environmental impacts and future environmental permitting requirements are identified and mitigating measures are implemented. Tshipi is compliant with Environmental Permitting requirements and has undertaken strategic amendments of its Environmental Management Program ("EMP") to meet future business objectives.

The Environmental Authorisation ("EA") for EMP2, that caters for additional waste rock dump capacity, which Tshipi obtained from the Department of Mineral Resources ("DMR") during July 2019, was suspended as a result of an appeal that was lodged by the South African Heritage Resources Agency ("SAHRA"). SAHRA objected to the issue of the EA, having raised a comment in the Interested and Affected Parties/Authorities review phase that they were not consulted by the DMR before the EA was issued. Tshipi has responded to the original comment raised by SAHRA, and a decision on the appeal is pending from the Department of Environmental Affairs.

Note: the summary Statement of Profit or Loss and other Comprehensive Income and Statement of Financial Position were not subject to audit review, however KPMG SA have concluded a half-year review on Tshipi's trial balance and management accounts.

#### **MARKETING**

Jupiter's manganese marketing branch in South Africa sold a total of 845,035 dmt, resulting in marketing fee income of ZAR63.1 million (\$6.3 million) (HY2019: ZAR63.1 million; \$6.5 million) and a net profit after tax of ZAR30.5 million (\$3.0 million) (HY2019: ZAR55.1 million; \$5.7 million).

#### **CENTRAL YILGARN IRON ORE PROJECTS**

The Mount Ida Magnetite and Mount Mason DSO Hematite projects remained under care and maintenance. No exploration or development activities were undertaken during the period.

Jupiter launched a review into strategic options available for these assets, in order to realise further value for shareholders. Work is ongoing considering the drive towards higher grade iron ore feed in China and potential capacity on the rail and at port.

Jupiter has commenced stakeholder consultation relating to its Mount Mason project in line with the above economic reassessment and its statutory requirements.

The Consolidated Statement of Cash Flows should be read in conjunction with the notes to the consolidated financial statements.

#### **NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

These consolidated financial statements and notes represent those of Jupiter Mines Limited ("Jupiter") and its Controlled Entities (the "Consolidated Group" or "Group").

#### **BASIS OF PREPARATION**

These general purpose financial statements for the interim half-year reporting period ended 31 August 2019 have been prepared in accordance with requirements of the Corporations Act 2001 and Australian Accounting Standards including AASB 134: Interim Financial Reporting. Compliance with Australian Accounting Standards ensures that the financial statements and notes also comply with International Financial Reporting Standards. This group is a for-profit entity for the financial reporting purposes under Australian Accounting Standards.

The half-year financial report does not include all notes of the type normally included within the annual financial report and therefore cannot be expected to provide as full an understanding of the financial performance, financial position and financing and investing activities of the consolidated entity as the full financial report. It is therefore recommended that these financial statements be read in conjunction with the annual financial statements of the Group for the year ended 28 February 2019, together with any public announcements made during the half-year.

#### ADOPTION OF NEW ACCOUNTING STANDARDS

The accounting policies adopted in the preparation of the interim financial statements are consistent with those applied in the preparation of the Group's annual financial statements for the year ended 28 February 2019, except for the adoption of AASB 16 Leases as detailed below.

AASB 16 Leases replaces AASB 17 Leases along with three interpretations (Interpretation 4 *Determining whether an Arrangement contains a Lease*, Interpretation 115 *Operating Leases-Incentives* and Interpretation 127 *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*). The new Standard has been applied using the modified retrospective approach.

The adoption of this standard has had no material impact on the current or previous reporting period and as such there have been no adjustments made.

The Company has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective.

#### SIGNIFICANT ACCOUNTING POLICIES

The Interim Financial Statements have been prepared in accordance with the accounting policies adopted in the Group's most recent annual financial statements for the year ended 28 February 2019, except for the effects of applying AASB 16.

#### Leases

The Group has applied AASB 16 using the modified retrospective approach and therefore comparative information has not been restated. This means comparative information is still reported under AASB 17 and IFRIC 4.

### Accounting policy applicable from 1 March 2019

#### The Group as a lessee

For any new contracts entered into on or after 1 March 2019, the Group considers whether a contract is, or contains a lease. A lease is defined as 'a contract, or part of a contract, that conveys the right to use an asset (the underlying asset) for a period of time in exchange for consideration'. To apply this definition the Group assesses whether the contract meets three key evaluations which are whether:

• the contract contains an identified asset, which is either explicitly identified in the contract or implicitly specified by being identified at the time the asset is made available to the Group

#### **NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

- the Group has the right to obtain substantially all of the economic benefits from use of the identified asset throughout the period of use, considering its rights within the defined scope of the contract
- the Group has the right to direct the use of the identified asset throughout the period of use. The Group assess whether it has the right to direct 'how and for what purpose' the asset is used throughout the period of use.

#### Measurement and recognition of leases as a lessee

At lease commencement date, the Group recognises a right-of-use asset and a lease liability on the balance sheet. The right-of-use asset is measured at cost, which is made up of the initial measurement of the lease liability, any initial direct costs incurred by the Group, an estimate of any costs to dismantle and remove the asset at the end of the lease, and any lease payments made in advance of the lease commencement date (net of any incentives received).

The Group depreciates the right-of-use assets on a straight-line basis from the lease commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The Group also assesses the right-of-use asset for impairment when such indicators exist. At the commencement date, the Group measures the lease liability at the present value of the lease payments unpaid at that date, discounted using the interest rate implicit in the lease if that rate is readily available or the Group's incremental borrowing rate.

Lease payments included in the measurement of the lease liability are made up of fixed payments (including in substance fixed), variable payments based on an index or rate, amounts expected to be payable under a residual value guarantee and payments arising from options reasonably certain to be exercised.

Subsequent to initial measurement, the liability will be reduced for payments made and increased for interest. It is remeasured to reflect any reassessment or modification, or if there are changes in in-substance fixed payments.

When the lease liability is remeasured, the corresponding adjustment is reflected in the right-of-use asset, or profit and loss if the right-of-use asset is already reduced to zero. The Group has elected to account for short-term leases and leases of low-value assets using the practical expedients. Instead of recognising a right-of-use asset and lease liability, the payments in relation to these are recognised as an expense in profit or loss on a straight-line basis over the lease term.

On the statement of financial position, right-of-use assets are disclosed in property, plant and equipment (except those meeting the definition of investment property) and lease liabilities are disclosed in trade and other payables.

#### Finance leases

Management applies judgment in considering the substance of a lease agreement and whether it transfers substantially all the risks and rewards incidental to ownership of the leased asset. Key factors considered include the length of the lease term in relation to the economic life of the asset, the present value of the minimum lease payments in relation to the asset's fair value, and whether the Group obtains ownership of the asset at the end of the lease term.

For leases of land and buildings, the minimum lease payments are first allocated to each component based on the relative fair values of the respective lease interests. Each component is then evaluated separately for possible treatment as a finance lease, taking into consideration the fact that land normally has an indefinite economic life.

#### Operating leases

All other leases are treated as operating leases. Where the Group is a lessee, payments on operating lease agreements are recognised as an expense on a straight-line basis over the lease term. Associated costs, such as maintenance and insurance, are expensed as incurred.

#### NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### **CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS**

When preparing the Interim Financial Statements, management undertakes a number of judgements, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses. The actual results may differ from the judgements, estimates and assumptions made by management, and will seldom equal the estimated results.

The judgements, estimates and assumptions applied in the Interim Financial Statements, including the key sources of estimation uncertainty, were the same as those applied in the Group's last annual financial statements for the year ended 28 February 2019. The only exceptions are the estimate of income tax liabilities which is determined in the Interim Financial Statements using the estimated average annual effective income tax rate applied to the pre-tax income of the interim period.

The foreign currency translation reserve relates to the differences arising from the revaluation of the Jupiter South African Branch financial statements from South African Rand to Australian Dollars.

#### **NOTE 12: SEGMENT REPORTING**

The Group operates in the mining industry. The Group has identified its operating segments based on internal reports that are reviewed and used by the chief operating decision makers (the Board of Directors and key management) in assessing performance and determining the allocation of resources.

The Group's segments are structured primarily on the basis of its exploration and production interests. These are considered to be the Central Yilgarn Iron Exploration Project (Iron Ore), which is located in Australia, the producing Tshipi mine (Manganese) which is located in South Africa, and Jupiter's South African branch which carries the sale of Jupiter's share of manganese ore. Information is not readily available for allocating the remaining items of revenue, expenses, assets and liabilities, or these items are not considered part of the core operations of any segment. Any transactions between reportable segments have been offset for these purposes.

During the half-year period, there have been no changes from prior periods in the measurement methods used to determine operating segments and reported segment profit or loss.

The revenues and profit generated by each of the Group's operating segments and segment assets are summarised as follows:

Six months to 31 August 2019	CYIP – Iron Ore (Australia) \$	Jupiter Mines – Manganese (South Africa) \$	Tshipi – Manganese (South Africa) \$	Total \$

#### **NOTE 13: EARNINGS PER SHARE**

Both the basic and diluted earnings per share have been calculated using the profit attributable to shareholders of the parent company (Jupiter Mines Limited) as the numerator, i.e. no adjustments to profits were necessary during the half year periods to 31 August 2019 and 31 August 2018.

#### NOTE 14: FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS

AASB 13 requires disclosure of fair value measurements by level of the fair value hierarchy as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- Level 3: inputs for the asset or liability that is not based on observable market data (unobservable inputs)

The Group's financial assets and liabilities consist only of listed investments for both HY2020 and HY2019, therefore are measured and recognised at fair value at Level 1.

### **NOTE 15: FINANCIAL ASSETS AND FINANCIAL LIABILITIES**

### **Independent Auditor's Review Report**

To the Members of Jupiter Mines Limited

Report on the review of the half year financial report

#### Conclusion

We have reviewed the accompanying half year financial report of Jupiter Mines Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated condensed statement of financial position as at 31 August 2019, and the consolidated condensed statement of profit or loss and other comprehensive income, consolidated condensed statement of changes in equity and consolidated condensed statement of cash flows for the half year ended on that date, a description of accounting policies, other selected explanatory notes, and the directors' declaration.

#### **Basis for Conclusion**

Based on our review, which is not an audit, nothing has come to our attention that causes us to believe that the half year financial report of Jupiter Mines Limited does not give a true and fair view of the financial position of the Group as at 31 August 2019, and of its financial performance and its cash flows for the half year ended on that date, in accordance with the *Corporations Act 2001*, including complying with Accounting Standard AASB 134 *Interim Financial Reporting*.

### Directors' responsibility for the half year financial report

The Directors of the Company are responsible for the preparation of the half year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the Directors determine is necessary to enable the preparation of the half year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

#### Auditor's responsibility

Our responsibility is to express a conclusion on the half year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the half year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 31 August 2019 and its performance for the half year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*. As the auditor of Jupiter Mines Limited, ASRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a half year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

#### Independence

In conducting our review, we have complied with the independence requirements of the Corporations Act 2001.
